## Did You Know ...

Some of the oldest known paleontological records of man on earth have been found in Kenya.

## 50 FACTS ON KENYA

To learn more about Kenya visit  
[www.kenya.info](http://www.kenya.info).

► Several hominid fossils found in Kenya, including a homo habilis skull, which dates back 1.4 million years, and a homo erectus skull, dated at 1.5 million years old, have tagged Kenya the "Cradle of mankind".

► These fossils have contributed greatly to scientists being able to trace the history of the human species.
